

AssessmentsPro

AssessmentsPro is an assessment management system based on the new competency based curriculum in Kenya. The system is specifically designed and developed to simplify the process of educational institutions competency based curriculum assessments.

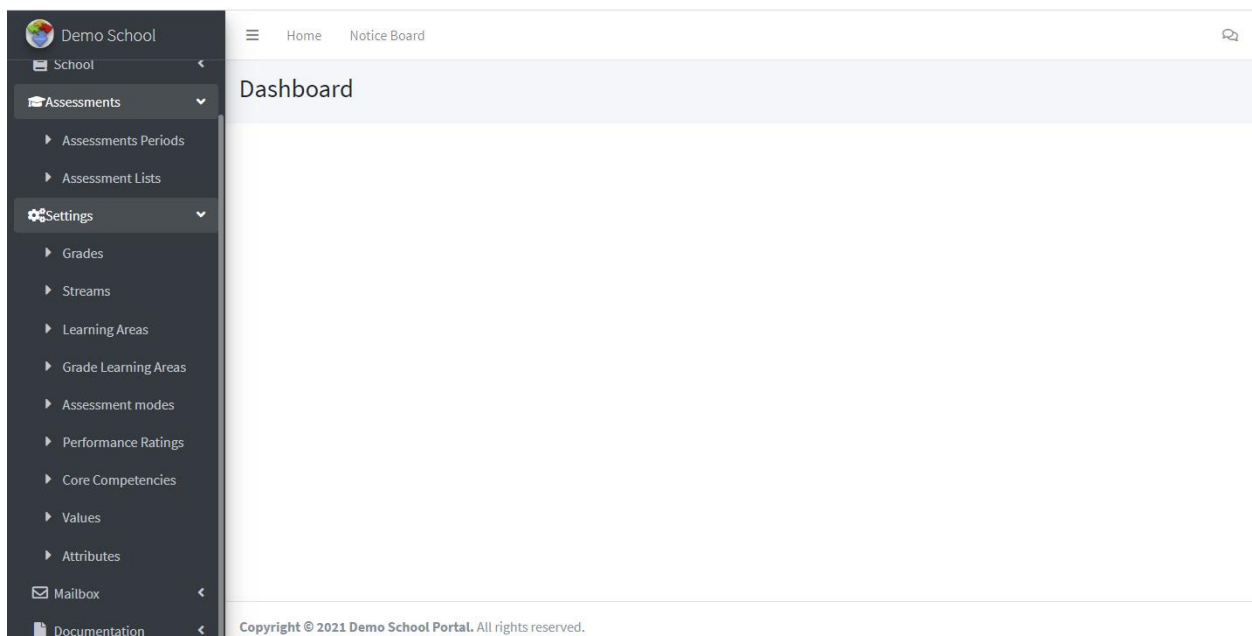

The system is web based and thus it can be accessed from anywhere as long as one has an internet connection. The system is light weight and mobile friendly thus can be accessed easily via a smartphone or tablet.

The system provides complete automation and paperless management of all assessments.

Every user is assigned his/her login details for accessing the system, this enables the school to have several users logged in the system concurrently ultimately easing the assessments entry process.

The tutor can configure the following items within the system

- Learning Areas
 - Strands
 - Sub Strands
 - Skills
- Assessment Modes
- Performance Ratings
- Core Competencies
- Values
- Attributes with the ratings

The portal is simplified such that it's very easy to fill in the assessment details and generate a report with a click of a button.

Attributes					

The system has the parents' module. The system increases communication with parents which in turn help improve student performance. Parents will be able to access and see information of his or her children and to keep an eye on the important happenings in the school. The parents can use this module to view student assessments as a pdf document and post their feedback which can be accessed by the teacher.

The system has an inbuilt communication module which the teacher can use to send information to parents and other system users.
